

RS Target Semi Automatics

RS300 Traditional Comb

RS400T Parallel Comb

A properly fit shotgun stock is a combination of adjustments. These adjustments are unique to each individual shooter and include the drop dimensions, the proper length of pull, pad rotation and the comb alignment and height. The “fit and feel” of a shotgun and where it patterns are all dependant upon these unique dimensions.

The major challenge for most student athletes and coaches is having a shotgun that “fits” them from season to season. The RS300 is the solution to this problem.

RS300 TARGET SEMI-AUTOMATIC

| Gauge | Barrel Length | Manufacturer's Ident. Number | Stock Type | Ejection Port | Approx. Weight | Suggested Retail |
